

# UMBILICAL VEIN AND ARTERY CATHETER

**AnderMed**

AnderMed

## Umbilical Vein and Artery Catheter

Easy and fast vascular access during the first 72 hours of life in neonates used for :

- Infusions
- Blood volume expansion
- Central venous pressure monitoring
- Parenteral nutrition
- Blood sampling

### SINGLE LUMEN

NEONATAL CATHETER FOR INSERTION IN UMBILICAL VEIN OR ARTERY.  
THIS MODEL INCLUDES:

- 1 flexible catheter to avoid perforating the blood vessel, with centimetric markings for perfect insertion-control
- 1 proximal female Luer-Lock hub
- 1 open or closed rounded distal tip to reduce vascular trauma

\*Specification

### OPEN TIP UMBILICAL ARTERY OR VEIN

| Fr mm | Outer Diameter mm | Gauge | Reference         | Catheter Length cm |
|-------|-------------------|-------|-------------------|--------------------|
| 3.5   | 1.2               | 18G   | UC-01-B 3.5Fx30cm | 30                 |
| 5     | 1.7               | 16G   | UC-01-B 5Fx30cm   | 30                 |
