

Disposable Enteral Feeding Set

Advantages

- Double layer tube: eye-catching color to avoid misconnection. The colorant has no contact with nutrition solution, won't enter into the patient's circulatory system.
- The connector comply with the recent new international standard to avoid misconnection, safety and reliable.
- DEHP-free.
DEHP has potential toxicity, including reproductive toxicity, developmental and carcinogenicity toxicity. The dissolved DEHP will cause harm to patients.

Specification

Mold	Description
EIS-11	Bag、Pump
EIS-12	Bag、Gravity
EIS-21	Puncture set、Pump
EIS-22	Puncture set、Gravity
